This is a popular class. Great fun and highly creative. You'll be wearing what you made within a week.

You will finish this class with a range of pieces made using the different techniques learned in the class including Dichroic glass.

Class Description

We begin the day by exploring the amazing variety of dichroic available and the use of frits and powders and all the tricks of the trade learnt by Maureen based on the Bullseye methods.

After an active morning we will load all the work into the kiln
And enjoy a delicious buffet lunch.

The afternoon is spent working with a glass drill and grinder
Preparing more work for the kiln.

During the day you will learn:-

- **Features of Dichroic Glass**
- **Assembling glass for fusing**
- **loading the kiln**
- **drilling holes and grinding glass**
